Protecting LGBTQ+ Health and Belonging Across San Joaquin County

WHY THIS MATTERS

San Joaquin County is home to more than 800,000 residents, yet only two organizations are dedicated exclusively to serving LGBTQ+ individuals.

For many people seeking affirming behavioral health care, youth support, prevention services, and care navigation, the San Joaquin Pride Center is a vital point of access.

We are at a pivotal moment. Time-limited grants that support these critical services are ending, and we are completing the transition to a sustainable funding model that will secure long-term care for our community.

Bridge funding sustains core services while we complete this transition and secure long-term revenue.

WHY INVEST NOW

Protect Access to Care.

Your investment ensures LGBTQ+ youth, adults, and families continue to receive behavioral health, navigation, and prevention services during this critical transition period.

Preserve Our Capacity.

Bridge funding protects our staff, programs, and partnerships—the foundation needed to secure healthcare contracts and build sustainable revenue.

Invest in a Proven Partner.

With strong leadership, sound governance, and a track record of securing more than \$1.2 million in grants, the Center is ready for what comes next.

“

The challenge we face is not a lack of community demand. It is the timing of multiple grant cycles ending before our transition to a more diversified funding model is complete.

”

PARTNER WITH US

Together, we can ensure that affirming care remains accessible for LGBTQ+ residents across San Joaquin County.
